More Than Ports

Port of Liverpool

The Heart of UK Steel & Metals Network

Getting you closer to the UK's steel hub

As the flagship handling hub in the Peel Ports Heart of Britain Steel network, the Port of Liverpool is a vital gateway for UK steel imports and distribution.

Its strategic west coast location is at the Heart of Britain's steel processing and stockholding cluster—it provides unrivalled access to both national and international markets, with direct links to major industrial regions.

STEEL AND METALS NETWORK

**THE HEART
OF BRITAIN**
STEEL AND METALS NETWORK

Recently, the Port of Liverpool set a new record in handling over 702,000 tonnes of bulk steel and metals – a testament to growing customer confidence and continuous investment in world-class infrastructure.

We adapt to an ever-changing market with scale, flexibility, and innovation..

- Multiple deep-water terminals — Seaforth & North 3 Canada
- Closest deep-sea terminal to the West Midlands which reduces supply chain costs and landside emissions
- Fully automated handling facility with automated gantry cranes
- Over **200,000** tonnes` storage capacity (at any one time)
- **590,000** sq ft covered warehousing – Over **600,000** with the new pop up shedcluster it provides unrivalled access to both national and international markets, with direct links to major industrial regions.

Liverpool Steel & Metals Terminal

Deep-sea terminal facility at the heart of the action

Seaforth Facilities

S7 SHED:	110,000 sqft – 25,000 tonnes capacity
S8 SHED:	34,000 sqft – 6,000 tonnes capacity
S9 SHED:	100,000 sqft – 20,000 tonnes capacity
S10 SHED:	50,000 sqft – 10,000 tonnes capacity
New Pop Up Shed:	30,000 sqft – 8,000 tonnes capacity
QUAYSIDE:	55,000 tonnes capacity

N3 Canada Facilities

AUTO:	125,000 sqft – 80,000 tonnes capacity
SHED 1:	75,000 sqft – 15,000 tonnes capacity
SHED 2:	15,000 sqft – 2,000 tonnes capacity
SHED 3:	40,000 sqft – 10,000 tonnes capacity
SHED 4:	11,500 sqft – 2,000 tonnes capacity
SHED 5:	7,500 sqft – 2,000 tonnes capacity
SHED 6:	15,000 sqft – 3,000 tonnes capacity
QUAYSIDE	10,000 tonnes capacity

Totals

Shed Total:	613,000 sqft – 183,000 tonnes
Quayside Total:	65,000 tonnes

Seaforth

The Seaforth area has been identified for further development of pop-up sheds and outside storage space. These facilities will increase overall handling and storage capacity, offering flexibility to accommodate a wider range of steel and metals cargoes as market demand grows.

Exact space and tonnage figures will be determined during the planning phase.

Warehousing facilities with 600,000 sq ft of secure and dry space exclusively for steel and metals storage and handling.

Rail terminal

RIVER MERSEY

N3 Canada

Stretching across both our Port of Liverpool and Birkenhead dock, our steels and metals terminals are equipped with specialised warehousing and automated handling equipment. Our North 3 Canada dock has the UK's first fully automated steel terminal.

- **177,000** shed tonnage capacity
- **27,500** quayside tonnage capacity
- **Closest deep-sea terminal** to the West Midlands
- **Ability to handle steel coil, rebar** and other bulk metal products

THE HEART OF BRITAIN

STEEL AND METALS NETWORK

Liverpool Steel & Metals

Connected by land

Excellent road connections via the M53, M57, M62, and M6

Connected by rail

Direct links to the Midlands and the Central belt Scotland

Direct rail links to Glasgow and the Midlands — efficient, lower-carbon transport

Connected by sea

Part of the Irish Sea Hub — serving Glasgow, Dublin, and Manchester

Linked to the Manchester Ship Canal — part of a developing green shipping corridor

Peel Ports Group

Steel & Metals

Peel Ports is a trusted logistics partner to the UK steel and metals sector, operating specialist terminals and handling facilities across a national port network.

With expert teams, modern infrastructure, and end-to-end logistics solutions, we handle a broad range of products — from coils and plate, aluminium to copper and a wide range of non-ferrous metals.

As UK industry evolves, so do we — scaling capacity and expertise to help manufacturers, processors, and distributors maintain resilient and efficient supply chains.
